

EZConfig for Scanning

Device Configuration Software

Honeywell's EZConfig for Scanning is a free software download from www.honeywellaidc.com that facilitates fast and easy one-to-one barcode scanner configurations. EZConfig for Scanning versions 4.1 and onward have been improved to provide both an intuitive interface and enhanced efficiency.

The upgraded EZConfig provides a HTML-5, platform independent browser-based utility that quickly modifies a scanner's settings to fulfill user's needs. Our improved tool now allows users to make scanning configurations from multiple interfaces. EZConfig offers port-agnostic, automatic device detection, including USB keyboard mode (which accounts for 75%+ of users).

EZConfig users can easily compare or clone their device settings. They are offered greater control of their configurations via real-time presentation of the changes they are making in the form of a "receipt", so that they can review before saving their modifications.

For more advanced users, the data formatting tab has been improved to simplify and expedite formatting changes. Changes can be made with minimal effort and shared easily with others via email or a configuration barcode. If one needs help during the process, EZConfig provides multiple links to useful resources such as online help files, tech support, feedback, and more.

Streamline your configurations' efficiency by downloading your free version of EZConfig for Scanning from www.honeywellaidc.com.

Features

- **User-friendly Configurations:** EZCS 4.1's Graphical User Interface (GUI) has been streamlined to offer clean and intuitive user experience. Both basic and advanced users can easily perform configuration steps with ease.
- **Reduces Configuration Time:** EZConfig 4.1 offers port-agnostic automatic device detection and uses a HTML-5 platform-independent browser-based utility.
- **Real-time Configuration Viewing:** Users are offered greater control of their configurations via real-time presentation of the changes they are making in the form of a "receipt", so that they can review before saving their modifications.
- **Lower Total Cost of Ownership and Reduce Carbon Footprint:** Minimize expenses related to costly service visits by emailing configuration barcodes instead of having technical support employees manually perform scanner configurations.

EZConfig for Scanning 4.1 Technical Specifications

EZConfig Application System Requirements

Operating System	Windows XP 32 bit (SP3 and above), Windows 7 32bit and Windows 7 64 bit
Processor	2 GHz Pentium IV or faster equivalent processor; 3 GHz or faster (recommended)
Memory	1 GB of RAM or more; 2 GB of RAM or more (recommended)
Hard Disk	Approximately 100 Mb for Installation
Display	Super VGA (1024 x 768) or higher resolution video adapter and monitor
Network	IP Network Card (minimum Local loop IP address)
Browser	Chrome Version 24 above (or HTML 5 supported) , Firefox Version 17 above (or HTML 5 supported), IE9 and Above

Communication Interfaces

Communication Interfaces	RS232, USB Serial, USB HID, USB HID Keyboard, USB HID Surepos
---------------------------------	---

EZConfig 4.1 Supported Honeywell Devices

Devices Supported	Xenon™: 1900 family / 1902 family / 1500 / 1912 / 1900i Granit™: 1910i / 1911i Voyager®: 1200g / 1202g (communications base) / 1250g / 1400g Hyperion™ 1300g Genesis™ 7580g Vuquest® 3310g Stratos® 2700 OEM: N5600 / N4300 / N8600 / N7300 / 5X80
